

~~SECRET~~/NOFORN - SKEET CHANNELS ONLY

PROJECT SUN STREAK (U)

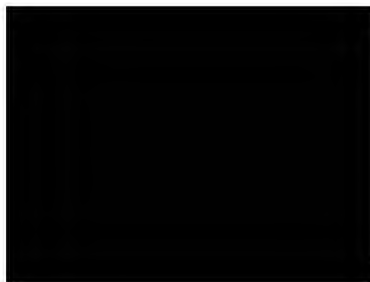

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

Session Procedures Report (S/NF/SK)

PROJECT NUMBER: 8713 SESSION NUMBER: 3
DATE OF SESSION: 19 OCT 87 TARGET COUNTRY:
REFERENCE: MISSION STATUS:
TECHNIQUE UTILIZED: CRV SOURCE IDENTIFIER: 011

1. (S/NF/SK) Monitor Tasking: Per tasking packet, determine the nature and extent of current activities at the given coordinates.
2. (S/NF/SK) Source Tasking: The session began in Stage III with a movement exercise, the intent being to get an overhead perspective of the site. The Viewer was then directed to explore the "source" of the "green flash" (see session #2).
3. (S/NF/SK) Summary: The Viewer's summary, including sketches, is attached.
4. (S/NF/SK) Comments: This monitor is confident in the substance and accuracy of the attached data. But, in some way, it seems to be "disconnected" from the actual site. I am left with the impression that the "target/task" has not been properly articulated in the customer's own mind or, if it has, that the viewer is working against a hidden agenda.

SESSION SUMMARY

SESSION: 19 OCT 87, 1015- hrs

The target is a "green flash" from a previous session. Associated with the green flash is a burst of explosive energy. In the background is a high-pitched whining sound, increasing in pitch and volume, like the revving-up of a jet aircraft engine. The object/device producing this sound is solid and heavy and is spinning at an incredible speed. It is large, round, cylindrical, metallic, and grey in color (ADL - like a turbine generator).

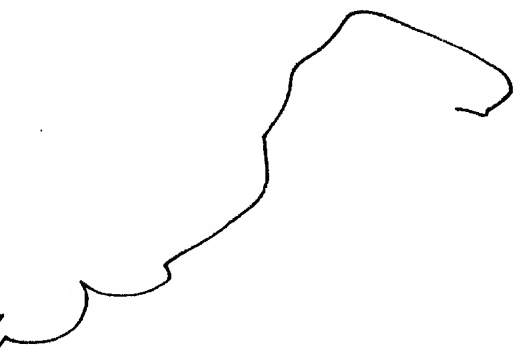

The green flash is produced at the end of a long, heavy, metallic cylinder/tube. This long, heavy tube has a small hole bored at the center that eventually connects to a larger opening, like a chamber, at the opposite end. ^(see sketch, page 5) This chamber seems to fill up with some form of energy. There is a feeling of something being compressed under terrific pressure. There is a kaleidoscope of colors associated with this event that is unusual. The "perception" of colors is evident, but the colors themselves are not physically apparent.

Following the green flash, once it leaves the tube, there is a perception of a square or rectangular-shaped slab of metal.... a dense, heavy metal with a rectangle-within-a-circle design on it. (see sketch, page 7)

VIEWER 011

1015hrs

from 5 miles up something should be visible

A. curving up,
peak, curving down
up, angle around
incline up, rough
across, curving
west

B. land structure
